

Darren Candidate | Senior Software Engineering Manager | PMI-ACP, CSM
candidate@somedomain.com | www.linkedin.com/in/candidate

SUMMARY

Experienced software engineering leader with a strong front-end and UX focus across FinTech, AdTech, and EdTech. Skilled in Agile delivery and modernizing legacy systems using GenAI tools to streamline development and boost innovation. Adept at leading global teams and delivering high-impact solutions in fast-paced environments.

WORK EXPERIENCE

Senior Software Engineering Manager, VP at Morgan Stanley

New York City, NY (May 2017 – Present)

- Leads a global cross-functional team of engineers in developing and maintaining real-time trading analytics applications. Key responsibilities included managing stakeholder expectations and transforming delivery through Agile methodologies, resulting in optimized development cycle efficiency and increased value delivered. Utilizes Generative AI (GenAI) tools to enhance software development through automated code generation and translation of legacy Perl codebases to modern Python.
- Tech: JavaScript, TypeScript, Angular, Python, Gen-AI, Git, VSCode, CoPilot, ChatGPT.

Software Engineering Manager, VP at Morgan Stanley

New York City, NY (May 2011 – May 2017)

- In my role as the Head of the UI development practice for the ISG User Experience group I led project delivery, planning, and resourcing for the engineering squad. Collaborating with central Toolkit teams, we developed and distributed libraries of themes and styles to support rapid development across various technologies.

Lead Front-End Software Engineer at Morgan Stanley

New York City, NY (May 2010 – May 2011)

- In my role as Lead Front-End Software Engineer for the ISG User Experience group I provided advanced front-end development for product-development teams, ensuring the implementation of highly stylized visuals and complex component interactions. By collaborating with Branding and Design teams, I created firmwide theme libraries to facilitate faster and standardized development of application front-ends. This led to improved user experience and efficiency in front-end development processes at Morgan Stanley.

Front-End Developer at Creative Lift

San Francisco, CA (Nov 2009 – May 2010)

- Front-end developer for a small digital advertising agency creating custom e-commerce websites and applications for local and national clients.

Front-End Developer at A Simple Theory

Palo Alto, CA (May 2008 – Oct 2009)

- Front-end developer for a small digital advertising agency producing original online games, 3D animations and interactive microsites for major consumer product campaigns

Front-End Developer at Comcast

San Francisco, CA (Apr 2007 – Apr 2008)

- Front-end developer for a major cable communications company producing high-fidelity, low-cost prototypes for the next generation of set-top-box application interfaces.

Front-End Developer at Allen Interactions

Berkely, CA (Apr 2006 – Apr 2007)

- Front-end developer responsible for rapid prototyping, courseware templating and LMS tracking integrations for an award-winning e-Learning company.

Front-End Developer at Allen Interactions

Minneapolis, MN (Nov 2004 – Apr 2006)

- Front-end developer responsible for rapid prototyping, courseware templating and LMS tracking integrations for an award-winning e-Learning company.

Front-End Developer at Martin Williams

Minneapolis, MN (Mar 2003 – Nov 2004)

- Front-end developer within a fast-paced, deadline-oriented digital department of a major national advertising agency responsible for creation of custom interactive experiences.
